

Exercise 3: School System

Objective

- Practice variable design and structured calculations
 - Analyze student performance using formulas
-

Input

- Student Name
- Scores of 5 subjects

Formula

Total Score = $s1 + s2 + s3 + s4 + s5$

Average = Total Score / 5

If all scores ≥ 70 :

Bonus = +5 (Maximum = 100)

Else:

Bonus = 0

Final Average = Average + Bonus

Performance:

$\geq 90 \rightarrow$ Excellent

80–89 $\rightarrow$ Good

70–79 $\rightarrow$ Average

60–69 $\rightarrow$ Poor and $< 60 \rightarrow$ Fail

Output

===== STUDENT PERFORMANCE REPORT =====

Student Name : _____

Scores:

Subject 1 : ____

Subject 2 : ____

Subject 3 : ____

Subject 4 : ____

Subject 5 : ____

Total Score : _____

Average Score : _____

Bonus Applied : YES / NO

Final Average : _____

Performance : _____

=====
